

B

usiness to Business

Many companies are replacing the traditional purchase order and payment process with an easy-to-use procurement system using business credit cards. For your clients, the ability to accept these payments becomes a vital element to their success. With the referral program you can offer multiple options to address this need.

- Acceptance of all business, corporate and purchase cards.
- Government and military purchase card acceptance.
- Stand alone and integrated software solutions for accepting payments.
- Internet E-commerce purchasing.
- Acceptance of traditional credit, debit, loyalty, gift and smart cards.
- Mobile and traditional point of sale electronic terminals.

Business customers today want to work with suppliers who understand the advantages of doing business electronically. Purchasing cards eliminate the need for requisitions, purchase orders, invoices, and checks – lowering operating costs for companies doing business with your clients. Many of those business clients want the ability to supply their customers with a mechanism for purchasing on-line as well. As a business “partner” with your clients, finding solutions to these kinds of scenarios is a priority. With CBS’s Referral Program, these solutions are only a phone call away.
